#### JASON CS – POSEIDON 4

Summary of interleaved mode requirements and preliminary results  
(CN interleaved ref. JC-CN-TAF-P4-00070)

<i>Written by</i>	<i>Responsibility</i> + handwritten signature if no electronic workflow tool
E. CAUBET	Radar engineer
<i>Verified by</i>	
L. PHALIPPOU	Radar altimeter expert
J. RICHARD	Head of Radar Engineering Department
L. RYS	Jason CS – Poseidon 4 Technical Responsible
S. BEDIQU	Jason-CS/Poseidon4 PA Manager
<i>Approved by</i>	
M. DESCHAUX-BEAUME	Jason CS – Poseidon 4 Project Manager

Approval evidence is kept within the documentation management system.

# Key Performances (LRM)

	Jason-3 (cm)	Jason-CS (cm)
Instrument range noise (MLE-3)	1.7	1.5
Ionosphere	0.5	0.5
Sea State Bias	2	1
Dry Troposphere	0.7	0.7
Wet troposphere	1.2	1
<b>Altimeter Range RSS</b>	<b>3</b>	<b>2.25</b>

- Based on Non-Time Critical Product
- Jason-CS adopts the goal for Jason-3 as requirement

Resolution  $R(h)$

SAR filters rates of change of phase to improve along-track resolution

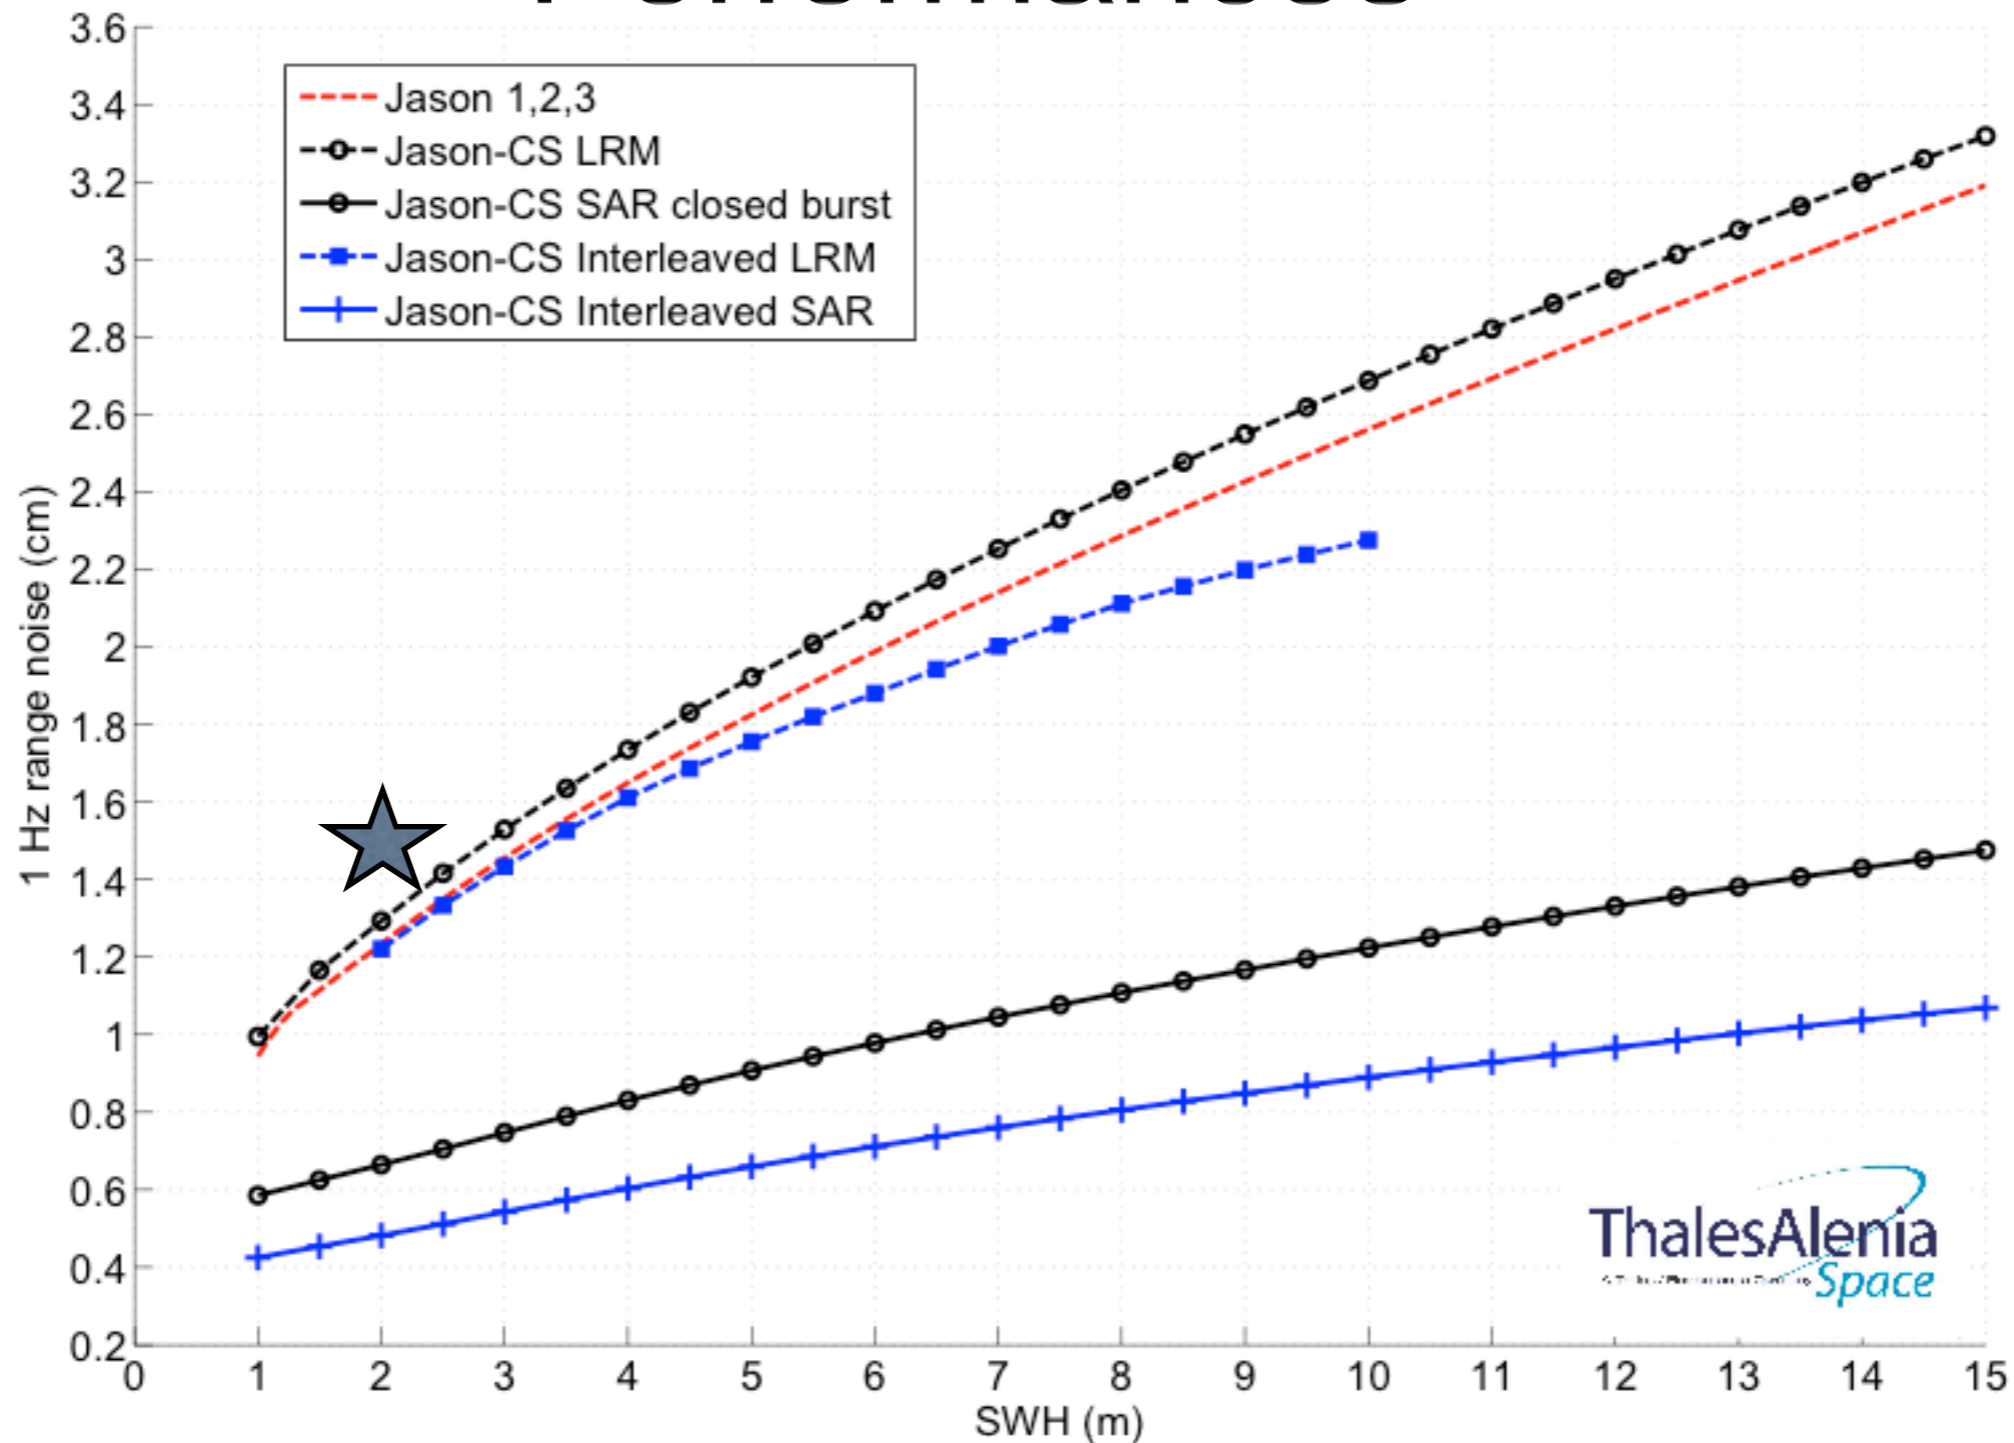

Closed Burst

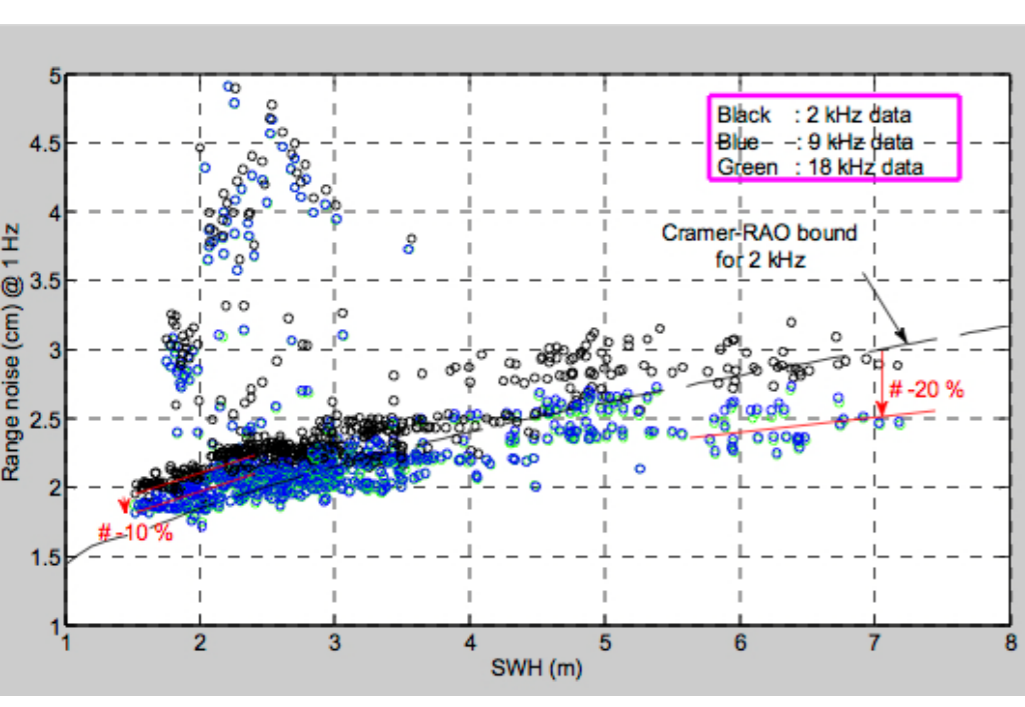

Open Burst  
'Interleaved'

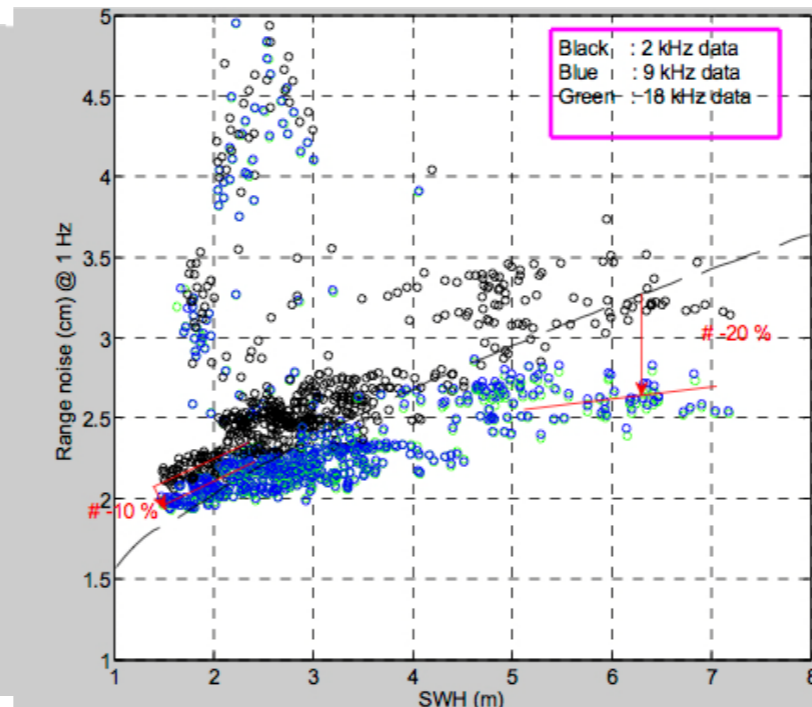

# Poseidon-4 Theoretical Performances

## LRM performances based on CS-2 SAR data

CS-2 data  
SNR 26dB

SNR degraded to  
15dB  
(Jason-CS case)

SNR degraded  
to 13dB

# Poseidon-4 Interleaved Performances

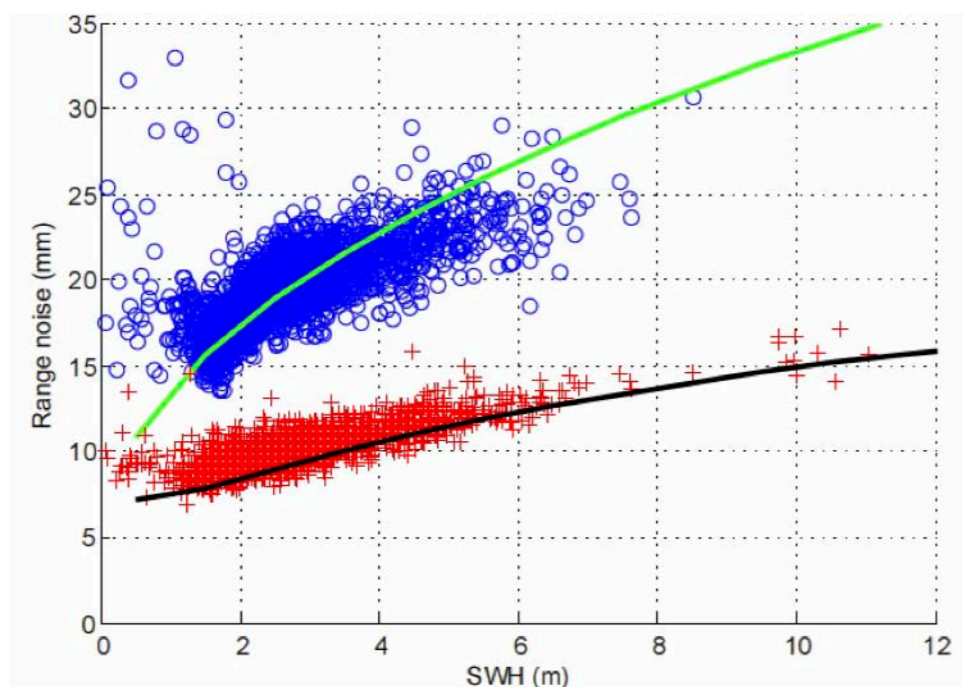

H (km)	LRM SNR Ku baseline (dB)	LRM SNR Ku interleaved (dB)	SAR SNR gain Baseline (dB)	SAR SNR gain Interleaved (dB)	LRM SNR C Baseline (dB)	LRM SNR C Interleaved (dB)
1332	14.4	12.4	10.8	23.2	13.5	11.5
1347	14.2	12.2	10.7	23.0	13.3	11.3
1362	14.0	12.1	10.7	22.8	13.1	11.2

**Ku-Band Requirement=12dB**  
**C-Band Requirement =11dB**

Space

# SAR Mode

## Key Questions

- How accurate are retrievals as a function of directional wave spectra?

- 300 metre along track and across track waves.

- Sea state bias?
- Verification of the CryoSat ocean performances at the Jason orbit are needed.
- Handling of pointing in the processing

# SAR Mode Key Questions

## Optimisation of stack filtering to improve leading edge and sensitivity to SWH?

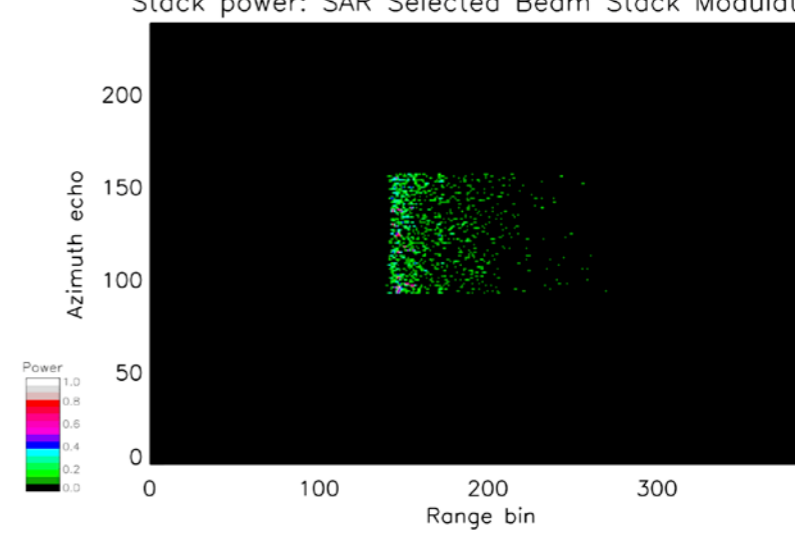

Stack power: SAR Full Stack

Stack power: SAR Selected Beams Stack

Stack power: SAR Selected Beam Stack Modulated

L1b Normalised Power Echo

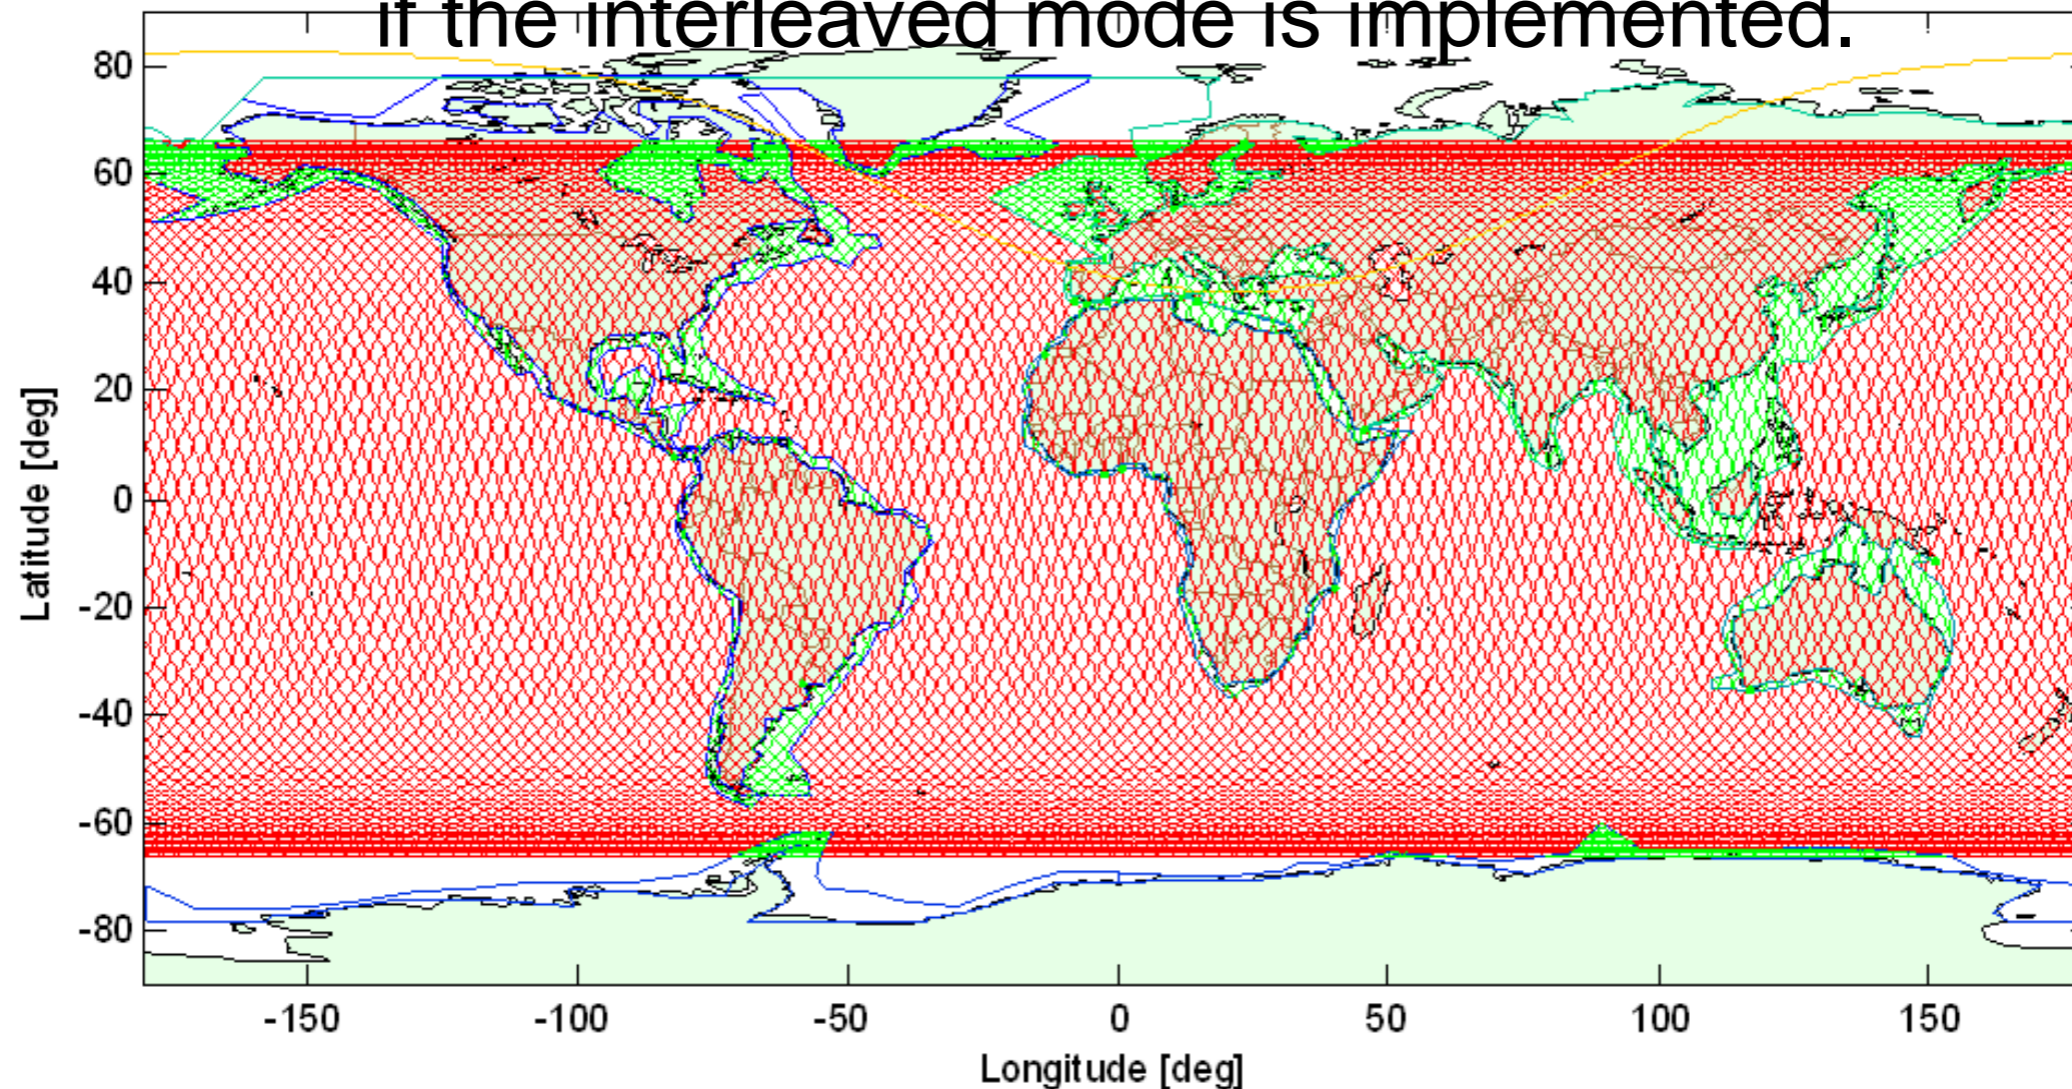

Example from  
CryoSat

# Jason-CS Sizing: Baseline operation

Initial mode mask for sizing system in terms of data, power and thermal:

This is not be the final mode mask which would become **obsolete** if the interleaved mode is implemented.

Thank You
