

An anomaly has been detected in the along-track files of drifting orbit missions (ERS-1 during years 1994-1995 and ENN). This is the list of the files corrupted (ref and upd series, sla and adt files, for e1 and enn missions). Those files have been updated on the ftp and users need to update their database with the new files which contain 20120116 as a production date (the last date in the name of the file).
